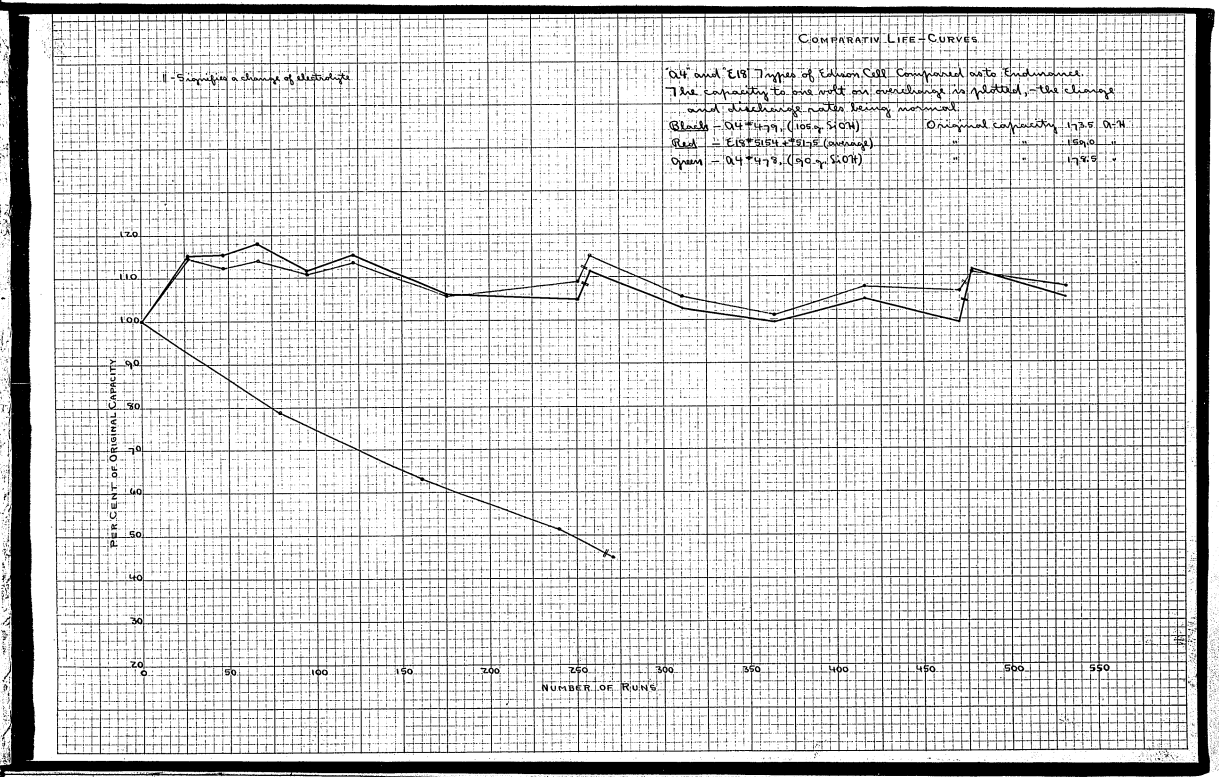
Miscellaneous
Vol. I



COMPARATIV LIFE-CURVES
"D4" and "E18" Types of Edison Cell Compared with Endurance.
The capacity to one volt on overcharge is plotted, the charge and discharge rates being normal.
Black - D4*479. (105 p. S.G.H)
Original capacity 173.5 A.H.
Red - E18*5154 *51-E (average)
" " 169.10 "
Green - D4*479. (90 p. S.G.H)
" " 173.5 "
1 - Signifies a change of electrolyte
